Convalescent Servicemen Enjoy Weekly Visits to the Museum.

## Reports to Members

### President

The times of late have not been propitious for carrying on the normal activities of the Auckland Institute and Museum. The precautionary measures for public safety rendered necessary by the entry of Japan into the war have made it obligatory to hold almost all functions of the Institute during the hours of daylight and to suspend for the time being those which hitherto have been held in the evening. Much of the valuable material usually housed in the Museum has been removed to places of greater safety. The staff has been depleted by enlistments in the armed forces. But despite these serious disadvantages the Institute has continued to render a valuable service to the public. The educational work in connection with the schools has been carried on as energetically and successfully as ever. The Sunday afternoon lectures drew record attendances. Many inquiries on technical subjects, some of them having a direct bearing on the war effort, were received and answered. Servicemen, both of our own forces and of those of our allies, have visited the Museum in large numbers. The staff have placed themselves at the disposal of these visitors whenever possible and by means of film sessions, conducted tours, lecturettes, special exhibitions and explanatory memoranda have done a great deal to make the visits interesting and instructive. Thus the 74th Annual Report may be regarded as satisfactory.

**Staff.**—The Director, Dr. Gilbert Archey, has served throughout the year as Lieut.-Col. in the 4th Battalion, Auckland Regiment. Mr. A. W. B. Powell has, in addition to his regular duties, continued his appointment as Acting-Director and served as an officer in the Home Guard. Mr. V. F. Fisher, Ethnologist, is serving overseas in the New Zealand forces in the S.W. Pacific, and Mr. R. A. Scobie, former Education Officer, continues to serve in the 8th Army, Middle East Forces. During the year Miss Joyce Bartley, Recorder and Typist, was accepted for N.Z. Air Force duties.

We have recently lost an esteemed member of the honorary staff by the death of Mr. W. H. Hemingway, who since 1937 rendered valuable service as Hon. Entomologist. Mr. Hemingway installed in the Museum soon after his appointment an attractive display of tropical butterflies, moths and other insects. He spent a good deal of time at the Museum keeping the collection in first-class order and making additions as opportunity offered, notably some hundreds of

# AIM Ann Report

## 1942 to 1943

specimens collected during his 1937 trip to the Far East. Mr. Hemingway had a great affection for children and he could frequently be seen at the Museum on a Saturday afternoon personally explaining to children the wonders of insect life.

**Membership.**—At the beginning of the year the list comprised 165 life members and 407 annual members. During the year we lost 28 members by death, resignation and deletion, and 21 new members have been elected. The roll now stands at 565, of whom 167 are life members. It is gratifying to note that five life members were elected during the year. We welcome among us Captain Luther M. Strayer, the first member of the American Forces to join the Institute.

**Obituary.**—During the year we have lost by death many valued members: Hon. F. Mander, Rev. A. B. Chappell Mrs. A. B. Wilson, Messrs. E. V. Alison, E. C. Blomfield, A. M. Ferguson, W. H. Hemingway, C. V. Houghton, E. S. Kohn, R. A. Laidlaw and Thos. Miller.

**Congratulations.**—Congratulations are extended to Dr. L. I. Grange and Dr. L. H. Briggs on their election to the Fellowship of the Royal Society of New Zealand.

**Council.**—Seven well attended meetings were held during the year.

**Finance.**—Receipts were approximately the same as last year, a further slight reduction in members' subscriptions being due to the fact that more of our members are serving in the forces. The apparently substantial balance of £1,156 in the general account must be viewed in relation to the normal necessity of providing for two "lean" months from the end of the financial year to the receipt of the Museum maintenance contributions. A reserve sum of £500 is set aside to meet special war-time contingencies, and it should be noted in this connection that war risk insurances alone for the year increased from £21 to £341.

By his will the late Mr. J. A. Pond left to the Institute a legacy of £100 to commemorate the work of the late Mr. T. F. Cheeseman. It has been decided to endow with the money a prize to be called the Cheeseman-Pond Memorial Research Prize, and rules governing the awarding of the prize are now under the consideration of the Council. This prize should stimulate students' endeavours in pure scientific research. It was decided also to employ the £100 bequeathed by the late Mr. Ormsby Gore Adams for the purchase of educational films.

Nearly three-quarters of a century have gone by since the Institute came into being. From small beginnings it has grown to be a scientific and cultural institution of first rate importance. But it has always kept its popular character. Its resources have been at the disposal not only of scientific workers but of the general public as well. Many thousands of people visit the Museum each year. Its collections, some of them priceless, are available for inspection by any member of the public. Hundreds of public lectures have been delivered. The privileges of its valuable library are open to all members. But the monetary resources of the Institute are very limited, and in order to carry on its work additional revenue is urgently needed. One obvious way of augmenting its funds is by obtaining new members. It is suggested that each member might help in this direction by bringing the claims of the Institute to the notice of their friends.

A. H. JOHNSTONE.

## Chairman, Trust Board

Our total invested funds amount to £29,975/3/9, made up as follows:—

Mortgages	..	..	..	9,776	1	3
Debenture	..	..	..	8,260	1	1
Stock	..	..	..	11,939	1	5

£29,975 3 9

Awaiting Investment .. .. £1,594 17 7  
(Since invested in 3% Government Stock)

All the investments can be looked upon as satisfactory, with the possible exception of one mortgage security. In this case principal reductions are being obtained, thus improving the margin of security. Practically all the interest on our mortgage investments is paid up to date.

V. J. LARNER.

## Acting Director

**Institute Meetings.**—It was noted that owing to war-time influences such as blackout and petrol restrictions, attendances at evening meetings during the previous year had been sadly depleted. Therefore, the Council reluctantly decided, for the time being, to suspend the Institute evening series and to concentrate upon the Museum Sunday lectures. One ordinary meeting was held, how-

# AIM Ann Report 1942 to 1943

ever, a paper, "China's Gift to Horticulture," being given by Dr. Lai-yung Li (of Lingnan University), now Assistant Botanist, Plant Research Bureau, Wellington; and another by Mr. F. J. Newhook, M.Sc.

**Sunday Lectures.**—In marked contrast to the evening lecture attendances, the Sunday series was extremely well patronised, attendances averaging 207 for each lecture. Subjects featuring New Zealand natural history, ethnology and topography were chosen.

Professor A. Wall: "The Southern Alps."

Mr. E. G. Turbott, M.Sc.: "Animal Wonders of New Zealand."

Miss Olga Adams, M.Sc.: "Maori Weaving and Dyeing."

Mrs. Olwyn M. Turbott: "Greenstone Trails."

Miss L. M. Cranwell M.A., F.L.S.: "The Story of Kauri."

Mr. A. W. B. Powell, F.R.S.N.Z.: "Chatham Islands."

Miss L. M. Cranwell, M.A., F.L.S.: "New Zealand Botanical Films."

Captain Samuel W. Smith (U.S. Army): "The Navaho Indians."

**Anthropology and Maori Race Section.**—Chairman, Mr. A. T. Pycroft; Hon. Secretary, Mrs. Graham Turbott.

A short syllabus was arranged and in spite of war conditons and the absence of so many of our members on active service, all lectures were very well attended.

Papers were given by Mr. Winiata, Mr. R. Sibson, and also by Miss M. Ropata and Mr. E. Rewiti, both members of the Maori Students' Association.

**Astronomical Section.**—President, Mr. R. A. McIntosh, F.R.A.S.; Hon. Secretary, Mr. T. Rounthwaite.

No ordinary meetings have been held in the past year owing to the difficultly of obtaining lecturers, and the Tuesday night demonstrations at the telescope have been discontinued for the same reason. Nevertheless, the membership of the Section has increased by 5 to 44.

The Section's journal, "Starry Pages," is still being published every three months, though with difficulty, as the editor, Mr. McIntosh, is in camp. It is now in its third year of publication and contains articles from overseas journals as well as notes of value to observers.

The Section wishes to thank the University College Council and Professor Burbidge for the use of the telescope and the Physics lecture room.

**Exhibitions and Educational.**—Owing to adverse conditions, the Cheeseman Memorial Flower Show was not held this year, but the Cheeseman Memorial Competition took place as usual, the project being "The Economic Importance of the Native Flora and Fauna." Entries were small, but the standard achieved was very gratifying.

A special exhibition on "Basic Economic Plants of the Pacific," by Miss L. M. Cranwell, arranged by request primarily for the instruction of guerrilla units, has been kept up as an extended feature. Another feature is a demonstration of Maori plaiting and weaving by Mrs. M. Tuhapi and Mrs. R. Potatau, arranged through the courtesy of Mr. George Graham, which takes place every Tuesday in the Maori Court. This demonstration links up with another weekly fixture provided for the entertainment and instruction of organised visiting groups of convalescent United States servicemen, consisting of film sessions, lecturettes and a conducted tour through the Museum by members of the Museum staff.

Great interest was shown in an autumn display of native and introduced plant dyes applied to wools, prepared by Mrs. Puleine Spencer, of Hamilton.

**Display and Collections.**—There has been little opportunity for new display work during the year apart from special exhibitions designed to create popular interest in current affairs. Miss Cranwell's "Pacific Economic Plant Exhibition" has been already referred to, and there is also an exhibit by Mr. Turbott featuring six strategic minerals. Mrs. Turbott has completed several new arrangements in the Maori Hall with the object of filling gaps occasioned by the temporary removal of certain irreplaceable specimens. Also a section of a large monkey exhibit has been completed by Mr. Dover.

**Additions to the Collections.**—The list of accessions is smaller than in previous years, but, nevertheless, many valuable additions have been received in all departments. We are very fortunate in having received a large collection of Egyptian pre-dynastic artifacts, including early flints and pottery, 7500-4300 B.C., as well as slate palettes and a number of ancient pottery lamps of Egyptian, Roman, Greek and Arabic manufacture. This extensive collection was presented by Col. the Hon. F. Waite, D.S.O., M.L.C., of the Middle East Forces. Mr. E. Earl Vaile has presented a fine inanga greenstone tiki and Mr. C. R. Ford an

# AIM Ann Report 1942 to 1943

interesting letter by Major General Gordon, hero of Khartoum, just prior to his appointment to the Sudan. Mr. V. F. Fisher, who is serving overseas, has forwarded some interesting collections of potsherds and native artifacts which he has personally collected in New Caledonia. Reference to the accessions listed at the end of this report shows the variety and importance of a number of individual gifts.

**Publications.**—Museum scientific publications for the year consist of Part 6 of the Records of the Auckland Institute and Museum, including papers by Miss L. M. Cranwell, Dr. H. H. Allan and Miss Cranwell (jointly) and Mr. D. Spiller, as well as Bulletin No. 2 of the Auckland Institute and Museum, "The New Zealand Recent and Fossil Mollusca of the Family Turridae," by A. W. B. Powell.

**Marine Natural History and Palaeontological Collections.** Administrative duties have absorbed so much time that little, apart from general maintenance of the departmental collections, has been achieved. However, by maintaining a brief daily routine the world index of molluscan systematics has been advanced by the addition of 8,000 entries for the year, bringing the total of species cards to 24,000.

Five lectures were given, one in the Museum Sunday afternoon series, one to the Men Teachers' Guild and three to convalescent servicemen at United States local hospitals. In addition, very gratifying results were achieved by means of collections of attractive sea shells supplied to United States local hospitals for use in occupational therapy. Public response in supplying shells for this work was greatly appreciated. Further donations of specimens sent c/o. this Museum would enable the work to be continued.

Research work has been carried on intermittently outside Museum hours resulting in a substantial addition to the report on Antarctic Molluscan material being prepared for the Discovery Committee, London.

Enquiries have increased almost to the volume of pre-war years. Many enquiries were of a technical or economic character, one involved the preparation of a detailed report and several others of a security nature had a direct bearing on the war effort.

A. W. B. POWELL.

### Education Officer.

The most gratifying aspect of the Museum Educational Service this year is the fact that over twenty classes have paid regular visits to the Museum and have taken a course of lessons. The attendance has increased, the total number of children visiting the Museum in classes being 12,575. Despite the difficulties of travelling, there have been many visits from country schools: for instance, on two consecutive Fridays the Waikato schools reserved a special train to bring groups of small schools.

The subjects available to classes cover a series of 15 lessons on the Races of Mankind (the emphasis being on Maori and Pacific culture), 8 lessons on natural history subjects and 2 on world products. In each lesson slides are shown and duplicate Museum material is handled before the children go to the display cases.

A series of seven Sunday afternoon lectures and one film session was arranged.

Nine school cases have been completed, which brings the total number to 58. With the large attendance of school classes it would have been impossible to have produced school cases had it not been for the very willing co-operation of the Museum staff. The new cases comprise two on Maori Greenstone, Ancient Egypt, Stone Age Man, Tattooing, Agar and its uses, the Black-backed Gull, Hare and Rabbit, and Life Cycle of Three Insects. Further cases on insect life, and ethnological and botanical subjects are in progress.

As school cases are sent to 35 city and 66 country schools, it is imperative that more should be prepared. This will be made possible to some extent by the special grant of £55 made available for school cases by the Education Department.

A series of educational films was shown on four Saturday mornings to children from 37 primary schools and on Monday afternoons to secondary school pupils, the total attendance being 1,912.

It would be impossible to carry on the scope of this work were it not for the very valuable assistance of the 38 Training College students whom Mr. D. M. Rae, Principal of the Training College, has posted to the Museum.

With the co-operation of the Museum staff numerous botanical and zoological specimens sent in by children have been identified and in each case letters containing information about specimens have been sent to the children.

ZOE O. LLOYD.

# AIM Ann Report 1942 to 1943

## Botanist.

Owing to the fact that conditions prevented the holding of the Native Flower Show this year and also that there was no opportunity for field work, more time has been available to meet the increased demand for information, both general and special. Concerning the latter, it has been gratifying to find how many requests have related to pollen and peat problems. On the other hand it has been tantalizing to have so little time to deal with these properly, as neither the pollen nor the preliminary peat surveys have been completed. Assistance with Pacific plant lore has been easier to manage, especially since this section of the herbarium has been brought back to the Museum: this (particularly the fruits, etc., from Pitcairn) contributed to the display of basic economic plants of the Pacific associated with a lecture to guerrillas on March 19th. The display will be of some duration, as fresh material is to come from Fiji and the Cook Group. A summary of the plants and their uses was cyclostyled and copies of this have been distributed to many servicemen going "North."

A film entitled "Heart of Kauri" (prepared as a record of milling methods) was finished sufficiently for two showings in the spring; unfortunately, the sum available made it impossible to cover some important phases of the industry. In all, four lectures were prepared and help given in conducting parties of wounded around the Museum. Other educational work included the making of agar exhibits, one of them for the school service.

Late in the year Mrs. Pulleine Spencer lent her collection of wools dyed with local plants; this has aroused great interest. Other popular exhibits have been inlays made with native woods—a box presented by Mr. A. McCosh Clark, and a plaque by Mrs. E. Russell.

An appointment to the Board governing Smith's Bush (now Onewa Domain) was accepted, as also another to the natural history committee which is to advise the Centennial Park Board.

The following papers were printed in the Records: Vivipary in Phormium (jointly with Dr. H. H. Allan); New Zealand Pollen Studies: I: Key to the Pollen Grains of Families and Genera in the Native Flora. It is hoped to publish Part 2 during 1943.

LUCY M. CRANWELL.

### **Acting Ethnologist.**

War-time conditions have made it necessary to devote more time than ever to the care of dispersed material, while, at the same time, routine attention to collections which remain in the building has had to continue as usual.

In spite of changed conditions, we continue to receive accessions, and during the year the collections have been enriched by many additions. Among those of special note is a collection, now on exhibition of Egyptian antiquities sent by Col. the Hon. F. Waite, D.S.O., M.L.C., from the Middle East. Mr. Fisher, who is on active service overseas, has done valuable work for the department in collecting native pottery, shell material and adzes from the sites of ancient "workshops" to swell our New Caledonia collection. Other accessions include a fine greenstone hei tiki presented by Mr. E. Earle Vaile, a large carved fishing weight from Mr. Hibbard, of Kaipara Heads, and a wooden fishhook from Mr. Chisholm, of the same district; a collection of adzes from Mrs. A. Wilson, and a Gilbert Island shark tooth knife from Mr. T. E. Montgomery.

There has been little time for new display arrangements, but several new cases have been completed in the Maori hall, where many gaps had been left by the removal of irreplaceable specimens. These new displays are necessarily of a temporary type.

Seven lectures were given in the course of the year, and although enquiries are not so numerous as in the days before the war, many demands were made on the department both by letter and by interviews.

OLWYN M. TURBOTT.

### **Assistant Zoologist.**

The dispersed collections have needed special care, involving one major task of excavating buried spirit material which is now being packed in more accessible boxes.

A special display of six "strategic" war metals has been set up, and Mr. Dover has almost completed a section of a new habitat group of monkeys especially designed to include four new specimens mounted during the year.

Many of the technical enquiries now received, especially those about injurious insects, have a bearing on wartime economic problems and have been given detailed attention; in dealing with these the ready co-operation of the Plant Diseases Division has again been much appreciated.

# AIM Ann Report 1942 to 1943

Three outside lectures have been given, as well as regular lectures and guide talks to convalescent and other visiting servicemen. Exchanges of information by letter continues with men of home and overseas forces, several of whom have taken a recreational interest in natural history during periods of inactivity.

Educational work in co-operation with the Education Officer continues in the production of new cases, postal boxes and in the answering of numerous school inquiries.

Periodic progress has been made with research on the food of the grey duck, on blackbird photoperiodicity and on the "invasion" of New Zealand by spine-tailed swifts, the two last as part of co-operative studies throughout New Zealand. A brief report on the vegetation and bird life of Hen Island as seen on a visit at Christmas has been submitted to the Department of Lands.

E. GRAHAM TURBOTT.

## Librarian.

Library expenditure, £300/13/4, includes: Subscriptions to periodicals, £146/17/2; purchase of books, £111/5/8; binding, £41/10/7; sundries, 19/11.

Ninety books have been purchased and eight have been received by gift. There has been really no outstanding donation this year as in former years. The annual order for books will shortly be despatched to our agents in London. A big drain on the library is the great increase since the war in the price of periodicals and books, and the cost of binding.

It is very gratifying, however, to note that this year the periodicals and magazines subscribed to have arrived with marked regularity, not one being lost through enemy action. It will be noted that the list of periodicals and reports received is much less than in previous years. Mostly this is occasioned by the policy of the institutions concerned of postponing the mailing of their publications until there is an improvement in the shipping situation.

As mentioned in last year's report, a large number of the most valuable books have been removed for safe keeping, but there still remains a large amount of reference literature for the use of students and members.

MARSHALL C. CLELAND.

The Auckland Institute and Museum is an educational institution which gives free service to the whole community throughout the year.

Money is urgently needed to widen its activities and increase its service to the community by the spread of knowledge among present and future citizens.

If additional help cannot be given now, a bequest would be of great value.

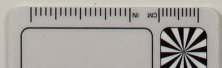

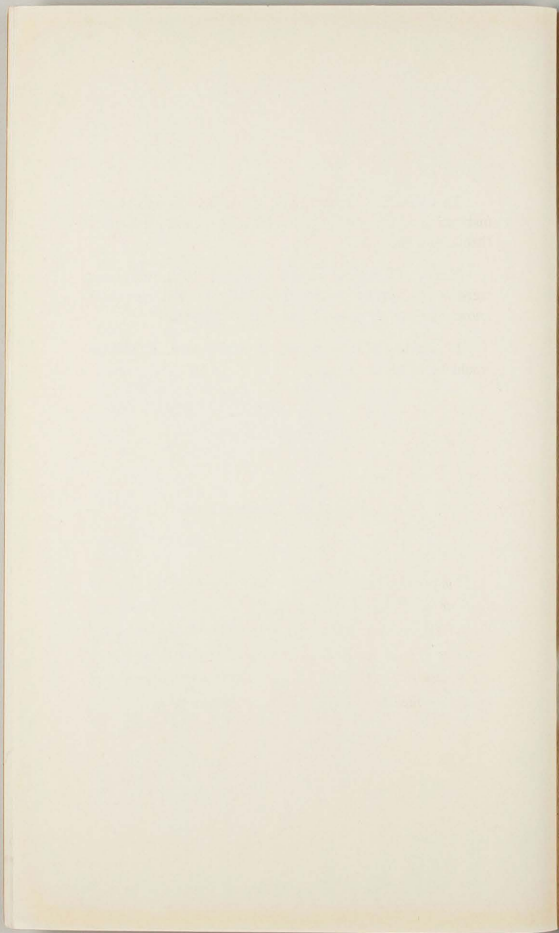

---

### Form of Bequest.

---

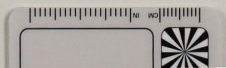

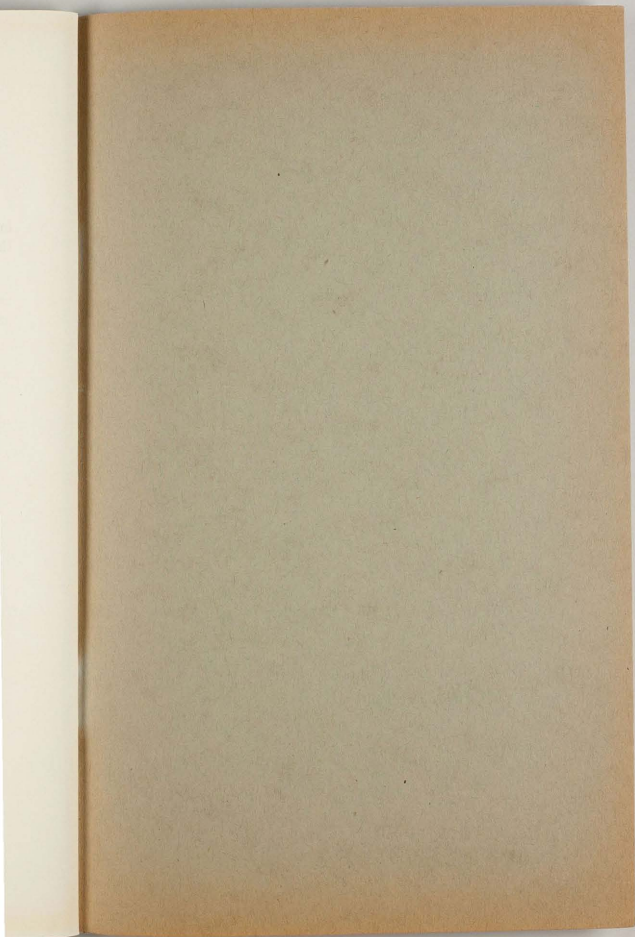

*I give and bequeath to the Institution known as the Auckland Institute and Museum the sum of £..... free of succession or estate duty to be applicable for the general purposes of such Institution. And I declare that the receipt of the Treasurer or the proper officer for the time being of such Institution shall be a sufficient discharge for the same.*
